Dr. Anthony Reed Presentation:

Dr. Anthony Reed's presentation discussed the Army Transition Assistance Program (TAP), the Army Career Skills program & the Military Life cycle of service men and women. Dr. Reed's presentation can be found [here](#). The TAP mission is to assist Soldiers, their Families and DA Civilians with simple, timely, effective and positive transitioning, promoting long-term satisfaction and association with the Army through Public Law and DOD Career Readiness Standards (CRS) attainment and compliance. Dr. Reed broke down the timeline of a soldier transition out, to where TAP services are utilized towards a smoother transition from military to civilian life. He discussed the Career Skills program and how transitioning Service Members have the opportunity to participate in employment skills training (EST), on-the-job training (OJT), pre- apprenticeships and internships with a high probability of employment in high-demand and highly-skilled jobs. Dr. Reed's presentation highlighted the importance of the program and pointed out the success of the Army Career Skill program with a 93% success rate.

Judge Semon Veterans Treatment Court Presentation:

Judge Semon discussed Pima County Veteran treatment court, and how it has become an essential part of the justice system. Jude Semon presented a video that can be found [here](#). The goal of Veterans Court is to rehabilitate and restore veterans as active, contributing members of their community. Veterans Court programs typically focus on veterans who are currently in, or entering, the Criminal Justice System. The Court creates and supervises treatment plans to address the underlying causes of the veteran's behavior and/or substance abuse issues. Judge Semon further elaborated on the education aspects that come with Veterans Treatment court. He pointed out that many veterans that enter the program are skeptical of the justice system, after counseling sessions and mentoring many veterans come out better than when they initially started the program.

Deborah Dominick VA Health Care Presentation:

Deborah Dominick's presentation discusses the VA Health care system. She elaborated on the mental and social worker perspective. Her presentation can be found [here](#). Subject: TALKING POINTS FOR MEETING WITH THE GOVERNOR

Cabinet Executive Officer Allmond has received an invitation for the Commission Chair, the Cabinet Executive Officer, and the Legislative Liaison to meet with the Governor to discuss the Commission's priorities and issues involving the greater Veteran community throughout Arizona. The following are proposed talking points for the Commission's consideration.

1. Briefly discuss the mission of the Commission referencing A.R.S. §41-602, *"The Commission shall provide policy advice to the Governor and the Director of Veterans' Services regarding Veterans' issues."* Since 1951, her Commission has had a broad mission to promote public awareness and enhance the well-being of past and present Arizona service members, Veterans, and their families. The Commission consists of eight members who represent Congressionally Mandated Veteran Service Organizations and reside within one of the three Veterans Administration regions within Arizona.
2. Validate that the Commission's Strategic Objectives and Priorities align with the Governor's priorities:
 - a. We need to promote sustainable employment, talent development, and the economic security of Arizona's Veterans and their families. Express concern that our County and Municipal governments are not hiring enough Veterans, especially in appointed senior executive positions. It is not enough to send Veterans to the Police and Fire Services; we need their administrative, management, and leadership talents in all sectors of local government.
 - b. We need to improve Veterans' access to mental, physical, spiritual, and legal support; especially in the rural, and more remote regions of our State and in our Tribal areas. Our partnerships between Veteran Service Organizations, first responders, law enforcement, medical practitioners, mental health professionals, religious leaders, social workers, Veterans' Courts, and elected and appointed officials are maintained and strengthened. We need to create a state-wide culture that truly believes that a call from a Veteran is not a change in our routine.
 - c. We need to ensure that Veterans and their caregivers have access to affordable housing and services. The lack of affordable housing affects all aspects of care for Veterans. One way that we can help Veterans is by raising the income thresholds for property tax exemptions for Veterans and their survivors.

- d. We need to improve the educational outcomes for Veterans and their families. While using Veterans Benefits to enroll in an Arizona institution of higher learning or vocational training is commendable and helps our economy, it is the final result of a degree or certification that really matters and ensures that the Veteran is competitive. We need to identify and remove the barriers that Veterans have in completion of their educational goals.
 - e. Finally, we should monitor, evaluate, and influence how water shortages and immigration policies affect our Veterans. While these issues affect everyone in Arizona, we need to consider their effects on Veterans, especially the most vulnerable in our communities.
 3. Advocate for local salary and benefits parity for State Veteran Home Nursing Staff (RN, RA, CVN), medical staff, and support staff. This addresses the staffing shortfalls in our State Veterans' Homes due to high demand on these medical specialties and the increasing cost of living in certain Arizona communities.
 4. Consider Cabinet Executive Officer Allmond's input to the Governor's State-of-the-State speech for future speeches. "Our Veterans deserve the best and we cannot express enough gratitude for their long and faithful service to our Nation. Research shows that Veterans are civic assets who strengthen the workforce and community. With more than 500,000 military Veterans living in Arizona, it is estimated that nearly \$2.5 billion dollars comes to the State from federal Veteran benefits. Furthermore, the economic impact of Veterans spending their pensions, disability compensation, educational benefits, military retiree pay, and Veterans' Employment funding exceeds \$5 billion per year." With the Governor's help, we can keep Arizona a state that really appreciates their Veterans.
 5. Recommend that the Governor's administration place a high priority on Veteran's Issues because Veterans are powerful economic, financial and social influencers that positively shape Arizona's future workplace and communities. Thank the Governor very much for her advocacy on behalf of Arizona's Veterans.

In conclusion, thank you very much for your consideration of my proposed talking points.

Very Respectfully,

Philip D. Cushman
Commissioner
